Data Card: JUST Regulations Assistant

Team Project — Phase 1 · Hamza Moeen Rasheed Eissa, Mohammad Ziad Abdelmajeed Alrousan, Asem Zakaria Alfreeh · Data lead: Mohammad Ziad Abdelmajeed Alrousan

Source	Official documents of Jordan University of Science and Technology (JUST), published for students on the university website: • Regulations and instructions section (www.just.edu.jo, *aboutjust / Regulations*): the Degree Regulation No. 1/1987 (amended), exam rules, medical excuses, student discipline 2024, student conduct code, weather suspension policy, schedule rules, level exams, change of major, fees, loans, student aid fund, and others. • University Calendar page (registration menu): academic calendar 2026-2027, 1st semester. • Data Science study plan chart (2022): made by the student team "Gharas" for JUST students. It is not an official document and will be replaced by the official current plan. The file-by-file list with links is in *data/SOURCES.md* in the repository.
Permission	The documents are public and published by the university for its students. We use them only for a non-commercial course project, we keep the original file names and cite the document and article in every answer. We did not ask for written permission because the documents are public; we will ask the Faculty if the project grows beyond the course.
Size	20 PDF files (64 pages, about 298,000 characters, roughly 100,000 tokens) and 1 image (the study plan chart). The largest document is the Degree Regulation (17 pages); the calendar has 3 pages; the other 18 PDFs are 1 to 7 pages each.
Language and format	Arabic (a few English terms). PDF files: 12 have a usable text layer, 8 are scanned or have broken Arabic text (6 read with Tesseract OCR, 1 with broken fonts also read with OCR, and the exam rules have partly broken text). One PNG image for the study plan chart.
Sensitive content	None. The documents contain public rules only: no student names, records, grades, or contact details. We do not collect personal data, and the assistant refuses questions about a student's personal record.
Known quality problems	• OCR text has errors, especially in numbers; important numbers are checked by hand against the PDF. • Two documents give different deadlines for a medical excuse (2 working days vs. 2 weeks); the assistant should cite both. • The study plan chart is from 2022 and unofficial; the calendar covers one semester only.
Sample	5 real examples in the repository folder *data/samples/*: the Degree Regulation, the Medical Excuses Instructions, the Weather Suspension Policy, the academic calendar, and the study plan chart. All 21 files are in *data/raw/* and their extracted text is in *data/text/*.

Seed test set: 30 questions with expected answers written from these documents before any model was run (*eval/seed_test_set.csv*).
